Navigation Menu Highlighting (HTML/CSS)

Question 3

You are tasked with styling a **navigation menu**. The requirement is to visually indicate the currently **active** link by applying a unique style when the active class is present on a list item (<li>).

Objectives:

- Add a title **Navigation Bar Styling** to the HTML file.

- Structure the navigation links using an unordered list (<ul>).

- Fill logic to highlight the link with the class **active** by setting its background color to **#007BFF** (a shade of blue) and its text color to **white**.

- Remove the default bullet points from the unordered list.

Constraints:

- Do not change the HTML structure or class names (.nav-menu, .nav-item, .active).

- Ensure the links are displayed in a single row (inline layout).

Fill-in-the-Blanks Answer Set (HTML & CSS)

index3.html (Incomplete)

HTML

```
<!DOCTYPE html>

<html lang="en">

<head>

  <meta charset="UTF-8">

  <meta name="viewport" content="width=device-width, initial-scale=1.0">

  <title>Navigation Bar</title>

  <link rel="stylesheet" href="style3.css">

</head>

<body>

  <nav>

    <ul class="nav-menu">
```

```html
        <li class="nav-item active"><a href="#">Home</a></li>

        <li class="nav-item"><a href="#">About</a></li>

        <li class="nav-item"><a href="#">Services</a></li>

        <li class="nav-item"><a href="#">Contact</a></li>

      </ul>

    </nav>

</body>

</html>
```

style3.css (Incomplete)

CSS

```css
.nav-menu {

    list-style-type: None;

    padding: 0;

    margin: 0;

    background-color: #333;

}

.nav-item {

    display: inline-block;

}

.nav-item a

    { display:

    block; color:

    white;

    text-align: center;

    padding: 14px 16px;

    text-decoration: none;

}
```

```css
.nav-item.active {

    background-color: #007BFF;

    color: white;

}
```
